

Fostering success
for every student.

“ Thank you to you and your team for providing another two days of training filled with purpose, thought and peace. The work and message you bring to us can be difficult, but knowing that you’ll be guiding the ship allows for our worries to be assuaged.”

Molly Liberto
Instructional Support Specialist/Curriculum Mentor
Greater Southern Tier Board of Cooperative
Education Services, New York

Our **consulting services** help schools, school districts, and state education agencies/ministries to identify and implement promising pathways to improve programs and processes, optimize financial resources, and promote student success.

Our **technology solutions** support this work by giving educators the means to gather, manage, and analyze data, including student performance information.

PCG Education tools and services are supported by nearly 30 years of management consulting experience and significant K-12 and post-secondary educational subject matter expertise. Our dedicated staff includes numerous professionals with general and/or special education credentials and/or associated teaching and leadership experience. We work with clients to identify organizational priorities and build the capacity that enables and sustains change.

Our experts work with you in the areas of greatest importance to your schools and students, specializing in

Education Consulting

Instructional and Data Management Solutions

Revenue Services and Case Management

➔ Education Consulting

We assist states, districts, and schools with curriculum development, instructional resources audits, design and facilitation of professional development and professional learning communities, school improvement, program reviews, and more:

College and Career Readiness

Our experts know College and Career Ready (CCR) Standards. We support CCR implementation in English language arts and Mathematics for thousands of educators and tailor our services to meet the unique needs of each state, district, or school partner. As the developers of the EngageNY English language arts curriculum for grades 6-12, we also partner with educators in their ENY implementation efforts.

Direct Student Services

Our Educational Partnerships flexible learning solutions offer scalable K-12 educational supports for schools and districts. Our distinguished network of locally-based, highly motivated educators and professionals provides schools with research-based, effective instructional programs and personnel resources for staff development, intervention initiatives, program implementation, supplemental instruction, and extended day.

MTSS/RTI Consulting Services

Our services focus on instructional relevance and are founded in research and experience. We help bridge the gap between research and practice as we collaborate with clients to streamline work process flows, improve student outcomes with a focus on core instruction, increase teacher effectiveness and productivity, and create and execute communication and strategic plans on effective implementation practices.

School and District Improvement

Our model brings research-based strategies and concepts to schools and districts that chronically under-perform. Our work in partnership with our clients yields demonstrable results and lasting impact. Improvement services are aligned to school and district needs, focusing on leadership, effective instruction, climate and culture, data use, and curriculum and assessment alignment.

Special Programs and Diverse Learners

We help districts or schools improve their instructional practices and learning outcomes for students with disabilities and for English language learners. Services may include program reviews and technical assistance, blended professional development and coaching, and instructional leadership coaching and mentoring.

Strategic Planning Services

We facilitate a change management process that allows organizations to imagine and plot a course to a brighter future for students, staffs, and communities by asking what they imagine. By working from the strengths within an organization and engaging the community, PCG helps identify measurable goals and action plans which support teacher expectations.

➔ Instructional and Data Management Solutions

PCG provides a complete set of consulting services and technology to manage education data to support data-driven instruction and personalized learning. Offerings include

Digital Learning Solutions

PCG provides technical consulting to support education data projects by documenting data dictionaries, creating data conversion plans, and establishing and managing test plans.

Instructional Management Systems (EdPlan™)

Our state-of-the-art assessment and curriculum management platform fully complies with QTI™ Version 2.1 and leverages emerging LTI, LRMI, and Learning Registry standards. Educators use our EdPlan™ tools to build, manage, and administer assessments; easily view data from multiple sources; group students by ability group; suggest supplemental resources; and modify lesson plans to differentiate instruction.

Pepper Professional Learning Community

Pepper is a vibrant online learning community where educators engage with high-quality, interactive content while collaborating with coaches and peers. Pepper is built on the powerful edX platform, the Cambridge-based education partnership founded by Harvard University and M.I.T. to support two important missions: improving online education, and advancing teaching and learning through research.

➔ Revenue Services and Case Management

PCG provides Medicaid revenue recovery and special education management services to more school districts in America than any other company. Tools and services include

Case Management (EdPlan™)

Our EdPlan™ special education case management system serves more than 5,000 school districts and nearly two million special education students. In addition to IEPs, our tools fully support students with plans associated with Section 504, gifted and talented, Limited English Proficiency and other student-based plans. Other modules support progress monitoring/RDA, Due Process, Behavior, IFSP, and graduation planning. PCG supports districts in timely assessment, eligibility determination, compliance monitoring, and state reporting. Our tools are tightly integrated with our Medicaid reimbursement systems to optimize efficiency and reimbursements.

MTSS/RTI Solution (EdPlan™)

Our web-based tools and wrap-around services support successful implementation of a multi-tiered system of supports. Our system fully supports RTI-A, RTI-B, and Positive Behavior Intervention and Support, as well as both the problem solving and standard protocol approach to RTI. Services include readiness analysis, leadership training, best practice mapping, tailored professional development, system implementation and actionable reporting.

School-Based Medicaid Services

Since 1992, PCG has provided US school districts and states with the support necessary to recover roughly \$4 billion in federal Medicaid reimbursements. PCG provides support in developing State Plan Amendments (SPA), negotiating with the Centers for Medicare & Medicaid Services (CMS), analyzing and setting reimbursement rates for services, managing random moment time study solutions via our web-based application, and constantly monitoring compliance. Our EasyTrac™ tool maintains caseloads and allows documentation of service delivery at the student level. PCG fully supports Fee-for-Service, Medicaid Administrative Claiming (MAC), and Cost Settlement programs.

What is your opportunity or challenge? We can help.
