

Integration Services

Solve the biggest integration challenges facing your agency across the technology lifecycle. We can help.

For the past 35 years, Public Consulting Group (PCG) has served as a trusted partner to thousands of public agencies across the United States, designing and delivering solutions to help them navigate economic constraints, demographic shifts, regulatory changes, and other obstacles inherent to the public sector. Many of the more than 2,500 professionals employed by PCG have considerable public and private sector experience as well as subject matter expertise in a wide range of areas: from in-depth program knowledge and advisory services to technology solutions, information systems, and more.

PCG's dedicated Integration Services Team focuses on solving our public sector clients' toughest integration challenges throughout the technology lifecycle. The team's approach to delivering integration services is:

Built upon a best practices framework for configuring applications that are tailored to meet the business needs of PCG clients

Methodical and agile, thereby ensuring continuous cycling through the stages of formulation, testing, deployment and assessment

Supported by Project Management Office (PMO), Independent Verification and Validation (IV&V), and Quality Assurance services

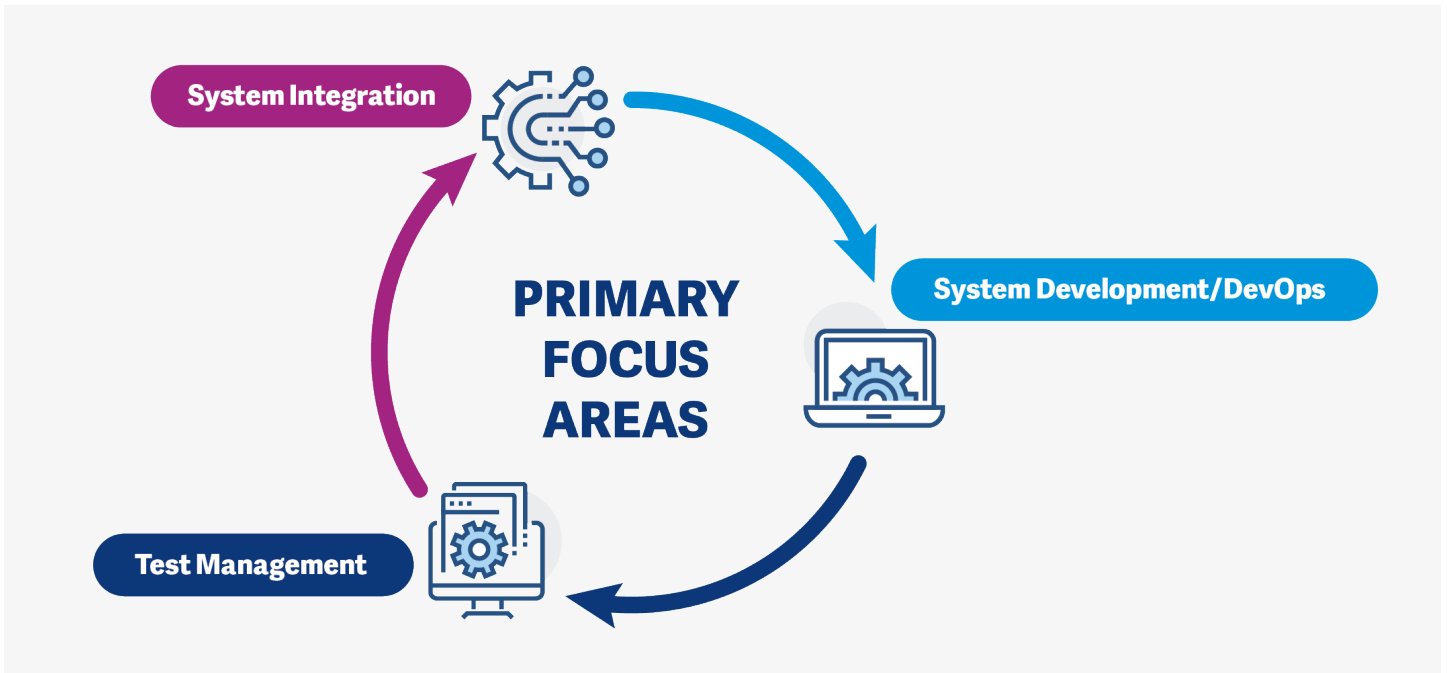

Collaborative and focused on value delivery design and configuration of modernized and innovative solutions

Designed to satisfy clients' immediate and long-term needs

Service Offerings & Solutions

Addressing the full technology lifecycle, our Integration Services Team is comprised of three primary focus areas:

Service offerings include application development, integration management, data migration, data warehousing, data analytics and reporting, Cloud native offerings, and testing.

Solutions include Software as a Service (SaaS), Platform as a Service (PaaS), and Cloud modernization innovations.
