

# Suicide Risk Assessment (SRA) Solution

Suicide prevention and risk assessments have been a top priority in K–12 schools and are now even more crucial due to the COVID-19 emergency.

The effects of traumatic experiences can be manifested as suicidal ideation and may lead to incidents of threat to self, or self-harm, which are reported in schools. To help address this growing need, school districts need to:

- ✓ Develop suicide prevention and assessment policies and procedures
- ✓ Identify evidenced-based protocols for identifying and assessing students at risk
- ✓ Implement processes for identifying, assessing, developing safety plans, and monitoring interventions and supports provided.

## EDPlan's Suicide Risk Assessment

Public Consulting Group's Suicide Risk Assessment (SRA) solution gives school districts the opportunity to implement a standardized, research-driven procedure to assess a student's suicide risk. With this tool, staff use common terminology to discuss a student's status and make plans for appropriate care. Our SRA process guides users to gather information relevant to a student's history, synthesize the information into a prevention-oriented suicide risk level determination, and develop a safety plan, as appropriate. It supports a range of questions for the analysis portion of the self-harm assessment, such as:

- ✓ Columbia Suicide Severity Rating Scale (C-SSRS)
- ✓ Suicide Assessment Five Step Evaluation Triage (SAFE-T)
- ✓ Combination of SAFE-T with C-SSRS

● **2nd**

Second leading cause of death for ages 10-24

● **2.5x**

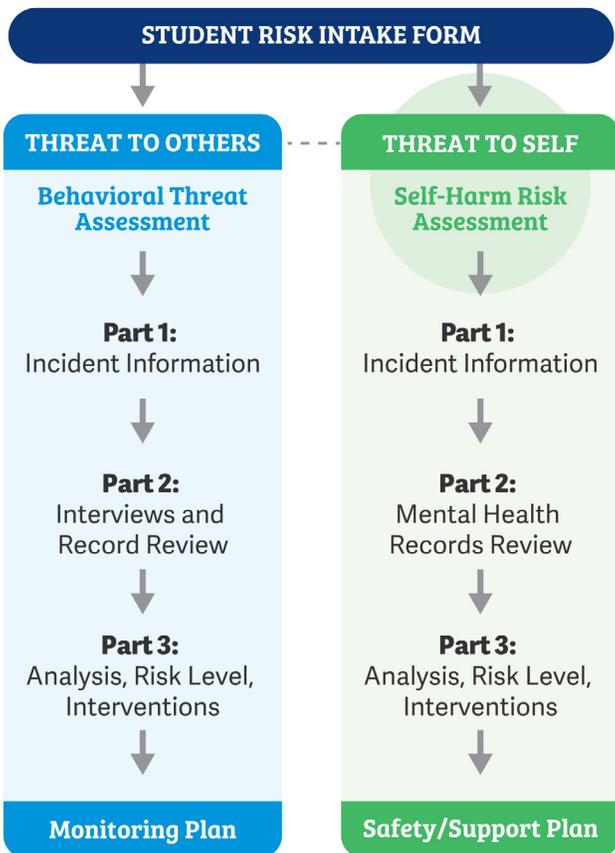

More than 2.5 times as many suicides as homicides

● **35%**

35% increase in the total suicide rate from 1999 to 2018

The SRA solution outlines a clear and effective process for users to follow when performing a risk assessment. The student risk assessment process aligns with your state and district-specific processes and procedures.

### STUDENT RISK ASSESSMENT PROCESS

“Addressing suicide risk is not something you can get trained on once and be done. This is such a hard problem with such serious consequences that people are going to feel and be unprepared unless they are engaged in an ongoing way.”

—Anthony Pisani, Associate Professor of Psychiatry and Pediatric, Center for the Study and Prevention of Suicide at University of Rochester

## EDPlan™

EDPlan is a suite of tools and services from PCG that helps you promote a plan for student success—in special education, academics, behavior, and beyond. EDPlan’s features have been designed in partnership with teachers, education professionals, and project management experts. EDPlan is being used in more than 30 states, supporting thousands of schools and districts nationwide, more than any other solution today.
