

Summer Professional Learning Workshops:

Designed to propel your Multi-Tiered System of Supports (MTSS) Implementation

EDPlan[™]
edplan.com

Public Consulting Group's MTSS Subject Matter Experts and Coaches deliver targeted professional learning workshops and personalized coaching sessions designed for individuals or teams leading school and districtwide MTSS implementation efforts.

The MTSS workshops offer a range of learning targets that emphasize the essential components of MTSS; tools to organize, prioritize, and propel implementation; and routines that are rooted in best practices.

Registration is by workshop and includes:

- One (1) two-hour virtual professional learning workshop
- One (1) one-hour virtual personalized coaching session

Individuals and Teams are welcome!

\$125.00 per person per workshop. Professional Growth Certificate provided. For teams of 8 or more, we can accommodate customized scheduling. [Click here](#) to submit an interest form!

Virtual Professional Learning Workshops and Coaching Sessions Are:

- Developed by leaders in education and MTSS subject matter experts
- Designed to be collaborative and personalized
- Beneficial to individuals, districts, or school level teams in any stage of implementation
- Created to be actionable and provide resources to continue the work

Summer 2022 Virtual Professional Learning Workshops

The Essential Components of a Multi-Tiered System of Supports (MTSS)

Education leaders supporting MTSS implementation will discover the essential components of a MTSS framework, its impacts on tiers of instruction to deliver a continuum of academic and behavioral supports. Topics for participants include equitable practices, shared leadership, and data-based decisions designed to improve outcomes within a school system.

June 7 or June 8 @ 10-noon ET

The MTSS Implementation Rubric—A Metric That Matters

Teams will interact with our implementation metric to measure, improve, and continuously monitor school systems. Together participants will inventory six critical focus areas of MTSS implementation and engage in readiness activities to take action and propel implementation in the fall.

June 14 or June 15 @ 10-noon ET

Accelerating Data-Driven Routines

Data teams are tasked to routinely lead data analysis exercises, provide instruction or intervention recommendations, and monitor the effectiveness of MTSS implementations. Participants will learn how to make thoughtful decisions based on data.

July 19 or July 20 @ 10-noon ET

All virtual learning will take place via Microsoft Teams. Upon registering, participants will receive a confirmation email, including the necessary information to log in, within 24 business hours.
