## Public Consulting Group (PCG)

Your Partner in Behavioral Health Assessments  
and Strategic Planning

PCG has over 25 years of experience helping health and human service agencies across the country deliver and improve critical public health and behavioral health services. Our team is experienced in providing systemwide assessments and developing strategic plans to improve health continuums of care.

#### Snapshot of Our Services

##### **Statewide System Assessments**

PCG performs statewide system assessments, including gap analyses and needs assessments, to identify capacity and workforce needs and potential gaps in service layers within systems.

##### **Access and Quality of Care Assessments**

Our team performs analyses to determine the access and quality of care for behavioral health systems. We will review state and national data to identify the best indicators for program performance.

##### **Policy and Program Development**

PCG works with state stakeholders to identify behavioral health needs and design innovative, data-driven programs supported by sustainable funding and partnerships.

##### **Community Engagement**

We conduct community engagement that is focused on reaching diverse individuals who represent varied backgrounds, roles, and involvement in the behavioral health landscape across the state.

##### **Capital Improvement and Funding Analysis**

PCG projects capital improvement and funding cost estimations to understand the financial considerations for new behavioral health infrastructures.

##### **Recommendations and Strategic Planning**

We develop recommendations and strategic plans to guide funding allocations for expanding and building capacity in the behavioral health continuum and provide innovative approaches and recommendations to address the needs of individuals seeking behavioral health services.

#### Proven Experience

The Oregon Health Authority contracted with PCG to complete a Behavioral Health Residential+ Facility Study to assess behavioral health capacity and unmet need for mental health residential, substance use residential, and withdrawal management facilities across the State. PCG collected data to identify current capacity for behavioral health facilities, calculated the gap in the continuum and the number of beds needed in the State, and created a five-year strategic plan to guide funding allocations to increase behavioral health bed capacity and meet the needs of Oregonians across the State.
