Experience

For 30 years, Greg has been innovating and leading large-scale education data system projects at the local, state, and national levels. First, as Chief Information Officer of the Massachusetts Department of Education and then as a consultant, Greg has directed successful statewide education data projects in South Carolina, Pennsylvania, Rhode Island, Illinois, Utah, New York, Georgia, North Dakota, Kentucky, and Wyoming. Greg led the team that created the Common Education Data Standards (CEDS) data model for U.S. Department of Education (ED) and served on the Board of Directors of the School Interoperability Framework Association (SIFA).

He co-chaired the development of two IMS Global technical standards, Competency and Academic Standards Exchange (CASE) and Comprehensive Learner Record (CLR). Greg was a primary contributing author to the 2019 Interoperable Learning Records (ILR) white paper for the American Workforce Policy Advisory Board and the ED white paper on Blockchain in Education. He served as an expert consultant to the T3 Innovation Network.
