

Jay Derby, Ph.D.

Subject Matter Expert

Jay Derby is a Senior Consultant at Public Consulting Group (PCG) responsible for leading AI initiatives for the Systems Integration Services and Support Center of Excellence. Jay has over 15 years of systems design experience, specializing in enterprise system architecture. Working closely with state eligibility staff, Jay has designed a powerful AI automation platform, built to help state staff.

Expertise

- AI Systems
- Enterprise Architecture

Experience

Jay has spent the last two decades in enterprise technology, supporting large, complex organizations through the kind of change that touches systems, operations, and people at once. He has led a range of product implementations across the public sector, working closely with the realities of regulated, high-stakes environments where technology has to hold up under real accountability. That experience—spanning enterprise-scale delivery and the specific demands of government programs—is what informs his current focus on applying AI to state health and human services in a way that is practical, compliant, and grounded in how these systems actually operate.

Certifications

- AWS Certified Solutions Architect

Education

Jay has a Ph.D. from Georgia State University and Master's degree from San Diego State University.
